

CANSURVIVE CENTRE MALAYSIA BERHAD

Role of Homeopathy In Cancer Management

SYNOPSIS

What is homeopathy? How does it look at cancer? How does it manage cancer and other serious illnesses? Is it a form of placebo treatment? Why is homeopathy the fastest growing alternative medicine in the world?

Dr. Lee will be answering these important questions. He will explain why cancer researchers have failed to find a cure for cancer and other chronic illnesses. He will be challenging conventional thinking about diseases and will describe to you "the true cause of illnesses". His controversial view that "if not for cancer, you would have died" will be expounded.

If we do not understand the real cause of illnesses, it is very unlikely that we can find a cure or prevent them. We are merely "barking up the wrong tree". "With a more accurate understanding of what makes us sick, we can better manage and cure, yes cure, serious illnesses including cancer."

Dr. Lee will explain how Homeopathy manages cancer by:

- 1 Finding a cure using cancer treatment protocols
- 2 Reducing the negative side effects of conventional treatment
- 3 Palliation and reducing terminal pain
- 4 Helping with psychological issues eg. shock and fear.

SPEAKER

CANSURVIVE & IT'S PURPOSE

Cansurvive is a support and information service for those who are challenged with cancer. Not just information and support, but a service that offers a greater awareness of the benefits of holistic, non-invasive cancer therapies, nutrition and diet, as well as orthodox treatments; what is available and where to access them. It is a window of light into the world of healing, where the word "Terminal" is a challenge, not a death sentence.
