

Talk On

# Vaccination: Helpful or Harmful? Are they safe?

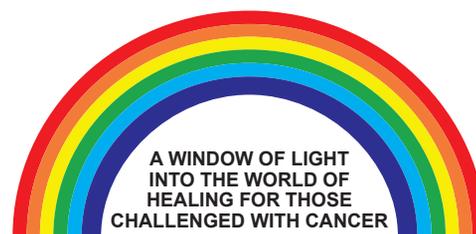

There is a controversy taking place, about the need for vaccines, globally. Vaccines have been around for a very long time. Why the controversy, then? This is because many questions are being raised about the safety and need for vaccines. Getting answers to these questions are important as it involves babies, their well being and health. What happens when babies are vaccinated? What happens if babies are not vaccinated? Can vaccination affect adults?

Each parent will want to know the impact to their child before they make any decisions. Concerns being raised re vaccines, are:

- Are they scientific, safe, effective and necessary?
- Are they modern medicine's miracle for babies, **or a miracle for big pharma?**
- Do their benefits outweigh the risks being highlighted, or are the risks higher?
- Do they protect and save lives from dangerous childhood diseases, or do they injure, maim and hurt and even kill babies?
- The National Vaccine Injury Compensation program and the role of the Vaccination Court of Federal Claims in U.S.A.

This talk will throw some light on this Controversies and provide answers to people who are seeking to know about the good and bad of vaccines.

**CANSURVIVE CENTRE MALAYSIA**  
A NON-PROFIT CANCER CHARITY ORGANIZATION

## About Speakers

**Dr H H Chan** HMD has been a practising Homeopath and Clinical Nutritionist for 36 years. Being a trained CEASE Therapist he is also involved in the treatment of Autistic Children since 2007.

Dr Chan was himself a victim of mercury poisoning from dental amalgam fillings at age 22. He developed allergies. He was driven into the field to look for natural ways to combat his allergies, his wife's Tinnitus, his daughter's Gastritis and his grandson's Selective Mutism.

Now he is a healthy 72 year old without the need for any Drug medication. His therapy involves DETOXIFICATION. He views that Toxins include those in Drug medications, Toiletries, Pesticides including GMO herbicides, Hair Dyes, MSG, Heavy Metals, Glyphosate, Fluoride, Aspartame, Formaldehyde and many more. Through his 36 years experience, he believes that persistent health conditions cannot improve without removing toxic substances from the body.

## CANSURVIVE & IT'S PURPOSE

Cansurvive is a support and information service for those who are challenged with cancer. Not just information and support, but a service that offers a greater awareness of the benefits of holistic, non-invasive cancer therapies, nutrition and diet, as well as orthodox treatments; what is available and where to access them. It is a window of light into the world of healing, where the word **"Terminal" is a challenge, not a death sentence.**

**Date : 15<sup>th</sup> APRIL 2017**  
**Time : 4:00 pm to 6:00 pm**  
**Venue: 6<sup>th</sup> Floor, Block 2,  
VSQ@PJ City Centre,  
Jalan Utara Section  
14, 46200 PJ.**
