

Dendritic Cell Therapy: Targeted Immunotherapy for Cancer

SPEAKERS

Naveen Kumar has an MBA and 18 years of working experience in the healthcare industry in Malaysia and Asia. Having worked as Director of Operations for a Johns Hopkins affiliated reference laboratory, he has been exposed to knowledge on various types of cancers, modern methods for cancer detection and treatment outcomes. His achievements include the increased awareness on HPV testing for cervical cancer detection in Malaysia by way of seminars and projects.

He has also worked with major hospitals on experimental therapy using stem cells for various diseases.

24th May 2014 (Saturday) 4.00 pm - 6.00 pm

Venue :

Malaysian Association For The Blind, Brickfields.

REGISTRATION

Kindly reserve your seats by the following options:

1. SMS your name and email address to 017 - 881 2287 or Send an email to ucansurvive@gmail.com with your name and handphone number.

WHO SHOULD ATTEND

People challenged with cancer & their family members, alternative practitioners, medical professionals and anyone who wants to have a greater awareness of health issues.

SYNOPSIS

Dendritic Cells are the pacemakers of the Immune system, crucial for the recognition of cancer cells and the introduction of anti-cancer immune responses resulting in destruction and killing of cancer cells. Dendritic Cells were discovered by Prof. Ralph Steinman, Rockefeller University, who went on to be awarded the Nobel Prize in Medicine.

Dendritic cells are targeted immunotherapy and adjuvant to chemotherapy.

Cancer is treatable as any other disease. With the application of current treatment techniques, surgery, radiation, chemotherapy and biologic therapy, cure is possible in nearly 2 of 3 patients diagnosed with cancer. (Harrison's Principles of Internal Medicine, 18th edition)

Dendritic cell therapy is Autologous and patient specific. It is manufactured with patients own blood and primed with a tumour antigen from the patients tumour tissue.

CANSURVIVE & IT'S PURPOSE

Cansurvive is a support and information service for those who are challenged with cancer. Not just information and support, but a service that offers a greater awareness of the benefits of holistic, non-invasive cancer therapies, nutrition and diet, as well as orthodox treatments; what is available and where to access them. It is a window of light into the world of healing, where the word "Terminal" is a challenge, not a death sentence.

Organised by : CANSURVIVE CENTRE MALAYSIA BERHAD (903023-M)
