

Probiotic To Fight Cancer

THE MISSING LINK IN OUR DIET

Synopsis ▼

Cancer is a very complex medical/health problem to treat. Probiotics and Gut Health is fundamental for a strong immune system. If the gut flora is out of balance, then unfriendly bacteria, candida will out-grow the friendly bacteria and this can lead to many health problems such as cancer, irritable bowel syndrome and other health issues.

Friendly bacteria or fermented foods which are rich in good bacteria have been shown to be able to control or overcome cancer and many other health problems. Many friendly bacteria or probiotics are able to help overcome cancer, tumours and other diseases.

This Seminar is an exposition of the research, clinical trials and break through studies of Dr.Nathan Ganapathi's 30 years of amazing work with Probiotics. His studies have shown that all Health problems are linked to the Gut Flora.

Learning Outcomes ▼

- 1. Taking charge of the body's immune and defence system.**
- 2. The best diet that nurtures probiotic balance in our body**
- 3. Techniques to help the body to build good bacteria in our system**
- 4. Clinical trials and real life studies**
- 5. Summary, conclusion and Q & A**

CANSURVIVE & ITS PURPOSE

Cansurvive is a support and information service for those who are challenged with cancer. Not just information and support, but a service that offers a greater awareness of the benefits of holistic, non-invasive cancer therapies, nutrition and diet, as well as orthodox treatments; what is available and where to access them. It is a window of light into the world of healing, where the word "*Terminal*" is a challenge, not a death sentence.

Speaker

Dr. Nathan A. Ganapathi

Dr. Nathan A. Ganapathi has Ph.D. in Microbiology from Auckland, New Zealand and a Diploma in Nutritional Medicine. He is also a Health Consultant for Wellness.

Dr. Nathan is a Botanist and a naturalist with 35 years of hands on experience in Microbiology, Forest Pathology, Probiotics and wellness.
