

The 10 Biggest Myths in Oncology

CANSURVIVE CENTRE MALAYSIA
A NON-PROFIT CANCER CHARITY ORGANIZATION

Speaker**Lothar Hirneise**

Lothar Hirneise is the former Research Director of the National Foundation for Alternative Medicine in Washington D.C.

He is also the only student of the well-known Researcher, Dr. Johanna Budwig (inventor of the Oil-Protein Diet and the famous Budwig Protocol).

For over 22 years, Lothar Hirneise has been Chairman of Krebs21, an association that has been investigating non-university cancer therapies.

Since 2006, he has been sharing his knowledge and findings in Germany at his 3E Centre (www.3e-centre.com), as well as during lectures he holds worldwide.

Lothar notes that more than 90% of those who he sees at the 3E-Centre are patients who underwent standard cancer treatments, and were subsequently told that nothing more could be done, when treatments failed.

More than 20 years ago, he travelled the world, to seek out and study cancer treatments and their success used in other countries. In this journey, Lothar Hirneise and his team were able to show that there were cancer therapies and treatments available worldwide that can help patients

Learning outcomes: ▼

- **Is the DNA responsible for cancer?**
- **Are cancer diagnosis safe and reliable?**
- **How meaningful are conventional cancer studies?**
- **Are there really successful non-university cancer therapies?**
- **How important are detox therapies for cancer patients?**
- **Is stress a cancer cause?**
- **Do palliative therapies really prolong life**
- **Is cancer really a problem of the immune system?**
- **What can you do when everyone says: We can't do anything anymore?**

even after they were told that there was not much else that could be done to help them.

Despite countless scientific studies that show that biopsies, operations and, above all, radiation, often stimulate cancer growth or create new cancer cells, this information is until now denied and not accepted.

Today, Hirneise is able to prove in a scientific way that mutations were, not the cause, but a concomitant phenomenon, in the development of cancer cells.

Unfortunately, in spite of the many cancer related deaths, the knowledge that alternative treatments can successfully treat cancer, this is still not accepted, as it is against the mainstream of oncology taught in Universities, and requires a rethinking.

He feels that it also not surprising that universities will not allow the teaching that tumors can develop even for people with healthy DNA.

As more and more people die of cancer every year, it is time to take a closer look at all the myths and dogmas associated with oncology and also to end the current and established treatments; the slaughter of the golden calves of medicine. He believes that this is the only way we can look forward to a change in thinking so that one day we will not have to fear cancer as much as we do today.

REGISTRATION IS FREE

CANSURVIVE & ITS PURPOSE

Cansurvive is a support and information service for those who are challenged with cancer. Not just information and support, but a service that offers a greater awareness of the benefits of holistic, non-invasive cancer therapies, nutrition and diet, as well as orthodox treatments; what is available and where to access them. It is a window of light into the world of healing, where the word *"Terminal" is a challenge, not a death sentence.*

(Registration starts at 2.30pm)

Date : Saturday, 20th March 2021
Time : 3:00 pm to 5:00 pm
Venue : Online via ZOOM
