

2023 Covid-19 Updates from Both Sides of the Divide

Organised By:

Webinar

Dr. Lim Teck Onn

Dr. Shankara Chetty

Topic	The Importance of the 2023 Covid-19 Booster Shots	Why Cancer Patients Should Stay Away from the Covid-19 Boosters
Speaker	Dr. Lim Teck Onn	Dr. Shankara Chetty
Time	2pm-3pm	3pm-4pm
	There will be a expert panel Q&A open to the public from 4pm – 5pm	
Biodata	<p>Dr. Lim Teck Onn is a MBCHB from University of Glasgow, MRCP (UK), FRCP (Edinburgh) and a Master of Medical Statistics from the University of Newcastle Australia. He worked in the Ministry of Health (MOH) Malaysia as a consultant nephrologist and his last posting was as director of the Clinical Research Centre until retirement.</p> <p>He is currently involved in clinical and health research, in collaboration with MOH, Universities, industry and NGOs. Recent notable research includes cancers & access to treatment, infections & vaccines as well as cell & gene therapies. He also consults for Healthy Malaysia, a non-profit NGO promoting access to advanced cancer screening & treatment technology.</p> <p>His latest, published medical research is "Sero-Prevalence of Covid-19 among workers in Malaysia." - Preprint at medRxiv https://www.medrxiv.org/</p>	<p>Dr. Shankara Chetty holds a degree in medicine and surgery and also has advanced education in genetics, advanced biology, biochemistry and microbiology. He runs a Family General Medical Practice in Port Edward, KwaZulu-Natal, South Africa with over 30 years of experience in Rural and Remote Primary Care.</p> <p>His breakthrough treatment protocols in Covid-19 early intervention and out-patient management was indeed truly a game-changer. This was even prior to the roll-out of the global vaccination drive. He has successfully treated over 10,000 people without hospitalization or death; nor the need for oxygenation or ventilation support!</p> <p>He has since addressed the European Union on early Covid19 treatment and is the Covid19 advisor to the State of Meghalaya, India. He recently accepted the position of Honorary Vice President with the Doctors Federation for the World.</p>

2023 Covid-19 Updates from Both Sides of the Divide

Organised By:

Webinar

Synopsis	<p>As endemic Covid19 continues in 2023, all of us who were unscathed should be mindful Malaysia has suffered a catastrophe (0.15% death rate), one not seen since World War 2 @ (1.5% death).</p> <p>Thanks to our vaccination policy, we have done much better than say Hong Kong, which recorded the world's highest Covid19 death rate after its failed Zero Covid policy left its population unprotected by vaccine.</p> <p>You need a personal action plan to protect yourself during the ongoing endemic Covid19, especially if you are elderly or immuno-compromised. And booster shot including the new bivalent vaccine and early use of anti-virals are the cornerstones.</p>	<p>Dr. Shankara Chetty will focus his talk around the adverse effects of the experimental Covid19 vaccinations around the world on:</p> <ol style="list-style-type: none">1. The immune regulation of cancers in remission2. The consequences of unrepaired DNA damage3. The consequences of possible DNA damage.4. The consequences of fragmented RNA, and the lipid nanoparticles in the overall cellular disruption.5. The current trends in cancer rates globally with cases in relation to vaccination status showing broadly the consequences being observed.

CanSurvive & its Purpose

CanSurvive is a support and information service for those who are challenged with cancer. Not just information and support, but a service that offers a greater awareness of the benefits of holistic, non-invasive cancer therapies, nutrition and diet, as well as orthodox treatments; what is available and where to access them. It is a window of light into the world of healing, where the word "Terminal" is a challenge, not a death sentence.

Sunday, 1:45pm - 5:00pm, UTC +8
